

Quietcog Reading Tracker Workbook

A calm spreadsheet for every book you read. No macros, no add-ins, no links to other files.

How it works

1. Open the Dashboard and set the year, your book goal and your page goal in the yellow-outlined cells.
2. Add every book to the Log sheet, one row per book. Use the drop-down lists for format, genre and status.
3. Enter a finish date for finished books. The Dashboard, the monthly table and the charts update by themselves.
4. To count a book towards the 52-Book Challenge, type the prompt number (1 to 52) in the Challenge prompt column of the Log (the book must have the status Finished).
5. Keep a wish list on the TBR sheet. Change the genre list on the Lists sheet if you like.

Good to know

- Only edit white cells. Grey and green cells contain formulas, so you can leave them alone.
- The Log has room for 300 books. To add more, drag the table handle at its bottom-right corner and copy the formulas down.
- Dates: use any date format your spreadsheet understands. A book counts towards the year set on the Dashboard by the year of its finish date.
- Compatibility: standard .xlsx, checked in LibreOffice Calc; not tested in Excel or Google Sheets.

About this workbook

- Made by Quietcog. Layouts and copy were generated in code with AI assistance. All text and designs are original; there are no book titles, covers, quotations or author names in this workbook.
- Personal-use licence: for you. Please do not resell, share or redistribute the file. Full terms: <https://quietcog.quietcog.workers.dev/terms>
- Not affiliated with any publisher, bookshop, library or reading app. For enjoyment and organisation only; not medical, legal, financial or educational advice.
- Support: gb1@mail.grokbots.com (Quietcog).

Reading dashboard

Everything on this page calculates from the Log. Change only the yellow-outlined cells.

Year	2027
